LinkedIn: linkedin.com/in/amal-sai-murari

PROFESSIONAL SUMMARY

Computer Science and Information Technology student with hands-on experience in backend and full-stack web development using Python, Java, JavaScript, SQL, Django, Node.js, Express.js, and React. Experienced in developing web applications, database-driven systems, authentication workflows, and payment gateway integrations. Strong foundation in object-oriented programming, database management, version control, and cloud fundamentals through Microsoft Azure AZ-900 certification.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, SQL, JavaScript, HTML5, CSS3

Frontend: React.js, HTML5, CSS3, JavaScript

Backend & Frameworks: Django, Node.js, Express.js, JDBC, Java Servlets

Databases: PostgreSQL, MySQL

Cloud & Tools: Microsoft Azure, Git, GitHub

Core Concepts: OOP, Backend Development, Full-Stack Development, Database Management, Authentication, API Integration

PROFESSIONAL EXPERIENCE

Avsora Software PVT Ltd — Software Intern

Vijayawada, India | June 2025 – December 2025

- Developed and supported backend web applications using Python and Java, applying object-oriented programming principles to create modular and reusable code.
- Wrote and optimized SQL database queries to improve application search performance and support efficient data retrieval.
- Used Git and GitHub for version control and team collaboration, helping maintain organized development workflows and reduce code conflicts.
- Collaborated with team members on backend development tasks and database-related implementation.

PROJECTS

Bus/Train Reservation System | Django, Python, PostgreSQL, HTML, CSS, JavaScript

- Built a full-stack reservation platform that enabled user registration, real-time seat search, and ticket booking tracking.
- Connected a JavaScript frontend with a PostgreSQL backend to process and manage user booking data.
- Integrated an external payment gateway API to support secure online transaction workflows.

Employee Registration System | Node.js, Express.js, React.js, SQL

- Developed a web application for employee profile management with user registration, login, and secure profile updates.
- Implemented backend authentication logic and developed responsive React-based UI components to support a smooth user experience.

E-Commerce Web Application | Java, Servlets, JDBC, MySQL

- Designed and developed an e-commerce web application using Java and object-oriented programming concepts including inheritance and polymorphism.
- Implemented JDBC-based database connectivity with MySQL to manage product information and shopping cart data.

EDUCATION

KL University

B.Tech. in Computer Science and Information Technology (CSIT)

June 2023 – Expected May 2027 | CGPA: 7.5/10.0

Sri Chaitanya Junior College

Intermediate (MPC)

May 2021 – April 2023 | 75.1%

Dr KKR Gowtham Concept School

State Board of Andhra Pradesh (SSC)

April 2020 – March 2021 | GPA: 10.0/10.0

CERTIFICATIONS

Microsoft Azure Fundamentals — AZ-900

LANGUAGES

English — Professional Working | Telugu — Native | Hindi — Conversational
